

# Deluxe34 C

custom lap steel stand

The Deluxe34 CUSTOM lap steel stand has brackets custom sized to the neck and bout of your steel. These brackets are fashioned with a 1/8" tolerance to allow the user to position the steel on the stand easily. Both the neck and bout brackets have two location holes to accommodate the difference in scale lengths. The neck bracket is threaded for height adjustment.

The brackets are mounted on a 2-1/2" wide aluminum base. Weight is 9 lbs in the case.

The cradle has 5 milled leg sockets so you can set it up with 3 or 4 legs.

The Deluxe34 CUSTOM stand comes with a heavy duty carrying case crafted with 2 layers of 600 denier pvc coated polyester. Custom stands can be ordered with 3 or 4 chrome on steel legs. Brackets are surfaced with 1/8" cork pad to create a soft and firm surface to cradle your steel guitar. Rubber padding is available.

Other leg options available.

C3 \$270.00

C4 \$300.00
